

For Them. And for Generations to Come.

Delivering the United States Marine Expeditionary Forces and their equipment into harm's way is a serious responsibility, requiring an exceptional, reliable level of performance in a variety of hostile environments. That's why Team SSC is pledged to deliver a Ship to Shore Connector designed and built to withstand the rigors of its mission and to provide increased capabilities, higher availability, ease of maintenance and lowest total ownership costs.

Team SSC is uniquely prepared for this mission. No other team has designed, delivered and supported SSC-relevant machinery, C4N systems, and state-of-the-practice Landing Craft for worldwide naval forces over the last 10 years. No other team is more focused on customer satisfaction. No other team can provide superior global life cycle support for generations to come.
